Information Security – TISAX® - Assessment

Dear Sir or Madam,

We fulfill our obligation to comply with the relevant regulations on data protection and the continuous improvement of information security with commitment and motivation.

To ensure the confidentiality, integrity, and availability of customer information, we have implemented internal procedures and controls as part of our organizational processes that can be implemented pragmatically and in compliance with the law and adapted as required.

To this end, we have taken extensive measures based on TISAX® (**T**rusted **I**nformation **S**ecurity **A**ssessment **E**xchange) and introduced an information security management system (ISMS).

TISAX® is used by European automotive manufacturers to provide an information security assessment for suppliers and is used to exchange information among participants. We are guided by the questionnaire on information security of the German Association of the Automotive Industry (VDA ISA). Our assessment was carried out by an independent, accredited testing service provider. The certificate can be accessed via the ENX portal only.

If you require further information, please feel free to contact us.

Best regards

Martin Fuchs
